

Vo Hoang Nam

Senior Python Developer | 7 Years Experience

nam.vh@email.com | +84 96 111 2233 | github.com/namvh | Ho Chi Minh City, VN

PROFESSIONAL SUMMARY

Senior Python developer with 7 years of experience building highly available backend systems and data platforms. Deep expertise in async Python, distributed systems, and platform engineering. Proven track record of technical leadership, mentoring junior developers, and driving architectural decisions.

WORK EXPERIENCE

Senior Python Developer

Shopee (Sea Group)

May 2021 – Present

- Architected async FastAPI service handling 800k daily requests with p99 < 80ms.
- Led migration from synchronous Flask to async stack; cut CPU usage by 45%.
- Designed distributed rate-limiting library adopted by 7 teams.
- Mentored 4 junior/mid developers; 2 promoted to mid-level within 12 months.
- Drove ADR (Architectural Decision Record) culture across the backend chapter.

Python Developer

Lazada Vietnam

Jun 2018 – Apr 2021

- Owned promotion engine service powering flash-sale events with 300k concurrent users.
- Introduced Redis-based idempotency layer eliminating 99% of duplicate orders.

EDUCATION

B.Sc. Computer Science – Vietnam National University (HCM)

2014 – 2018 | GPA 3.9/4.0

TECHNICAL SKILLS

Languages	Python (expert) Go SQL Bash
Frameworks	FastAPI asyncio aiohttp Django REST
Distributed	Kafka Redis Cluster gRPC Consul
Cloud / Infra	AWS (advanced) Kubernetes / Helm Terraform Prometheus + Grafana

NOTABLE PROJECTS

Async Rate Limiter Library — Open-source Python library (500+ GitHub stars) using Redis Lua scripts for distributed rate limiting.

CERTIFICATIONS

- AWS Solutions Architect – Professional (2023)
- Certified Kubernetes Application Developer (CKAD) (2022)
